PROFESSIONAL SUMMARY

Software Engineering / Computing HND graduate with a foundation in web development, relational databases, object-oriented programming, and responsive interface design. Project experience includes a PHP/MySQL e-commerce platform, a business inventory and sales tracking system, and a Python desktop data-analysis application. Interested in junior web development and remote opportunities where I can contribute to practical software projects and continue developing my skills.

CORE COMPETENCIES

- **Programming & Web:** JavaScript (ES6+), PHP, Java, Python, HTML5, CSS3, SQL
- **Web Design:** Responsive web design, web application development, UI/UX principles, Figma
- **Programming Concepts:** Object-oriented programming (OOP), SOLID principles, RESTful APIs, server-side scripting
- **Databases & Tools:** MySQL, relational database management (RDBMS), Git, GitHub, VS Code
- **Development Practices:** Software Development Life Cycle (SDLC), data structures and algorithms, debugging and optimization, unit testing

PROJECT EXPERIENCE

Velvet Vogue - E-commerce Web Platform

Technologies: HTML5, CSS3, JavaScript, PHP, MySQL, responsive web design

- Developed a responsive multi-page e-commerce website for a clothing retailer, including product catalogue categories and user account functionality.
- Implemented client-side shopping cart interactions and an administrative dashboard for inventory management.
- Reviewed the interface across multiple device viewport sizes to improve usability and responsive behaviour.

Rasaviyana Management System / Spice Sales Ledger System

Technologies: HTML, CSS, JavaScript, PHP, MySQL

- Designed a web-based inventory and sales tracking system to support daily operations and credit ledger management for retail shops.
- Structured a relational database for inventory, customer sales, and profit-margin analysis.
- Implemented net-profit calculations and revenue reporting features.

Dream Book Shop - Data Analytics & Visualization System

Technologies: Python, Tkinter, OOP, Matplotlib, automated testing

- Built a desktop GUI application to process and analyse a bibliographic dataset described in the original CV as containing over 2.6 million entries.
- Applied OOP and SOLID principles to organise the application code and reduce duplication.
- Created interactive bar, line, and pie charts to explore publication trends, author metrics, and language distributions.

SKILLS

- Team Work
- Leadership
- Researching
- Effective Communication
- Time Management
- Adaptability
- Problem Solving & Debugging
- Self-Learning
- Technical Documentation

EDUCATION

Higher National Diploma (HND) in Software Engineering / Computing

ESOFT Metro Campus | Completed: 2026

Relevant modules: Object-Oriented Programming, Data Structures & Algorithms, Database Design & Management, SDLC, Web Development, Professional Practice
